

Solutions To Reverse Global Warming

Zero Carbon Emission Tyres Recycling Plant

***Stop illegal dumping
& harmful recycling***

EXECUTIVE SUMMARY

AEL Enviro Group has created a revolutionary, high value & sustainable tyre recycling plant. The Singapore office will be the first-to-market in the region with a specific process to increase the value of unwanted tyres that are disposed to landfill, harmful recycle process or are illegally dumped.

Tyres can now be turned into premium recycled product. AEL tyres recycling plant will be the world-first environmentally friendly zero-emission and zero real waste. In addition to its environmental credentials, the tyre recycling plant is self-generating with the SYN Gas produced being fed back to the machine to fuel it. The gas derived from the tyre recycling process is used to perpetually power the plant.

On the same token, it also produces 5 premium commodity grade materials: Syngas, Diesel, Bunker Oil, Carbon Black and Ingot Grade Steel. This changes the end-of-life value of tyres from \$0 to approximately S\$2,000 per tonne.

COMPETITIVE ADVANTAGES

- Ground Breaking Innovation – **Zero Emission & High Efficiency Output**
- Solves Global Harmful Issue of End-of-Life Tyre Disposal
- Turns a Zero Value product into Valuable Resource of 5 Premium Grade Commodities
- High Demand Service with millions of tyres disposed per year
- Scaleable Solution in terms of low cost and space with Global Potential
- Government Supported since There Is No Effective Method Of Disposing of Tyres
- Meets EPA's stringent guidelines for emissions
- No Current Competition

3

KEY INVESTMENT HIGHLIGHTS

- The AEL process is a tested system
- The AEL process produces in-demand commodity materials
- AEL has supply chain in place for tyre acquisition
- AEL has supply chain in place for commodity disposal
- The AEL process is high income
 - S\$2,000 per tonne of tyres
 - Ready Buyers; e.g. Singapore Power
- Sustainable business solutions for local & global
- Defined exit strategy with stock exchange listing

MOVING FORWARD

AEI Enviro goal is to help the world become cleaner and greener. By embarking & continuously improving this technology, we are working on larger scale projects targeting at significant contribution to environmental protection:

- With Beijing government on Municipal Waste to Energy cum by-products plant to curb landfill & high cost incineration plants.
- To assist Cement production plants, Fossil Fuel Power Plant, etc. to meet zero emission requirement
- To treat toxic & harmful medical waste with chemical plant & hospital.

EXIT STRATEGY

AEL Group is aiming for an IPO within 3 - 5 years. The company will make the decision base on favourable market conditions.
